appointment cards

Print directly from your appointment book or appointment system a patient appointment card. It's that simple. No hand written slips, no mistakes – no hassle. And now use the 'Queue tickets', application for the busy surgery, issue a ticket and say goodbye to confusion and frustration for the patient and practice staff. All the above takes only a few seconds, saving staff time with every card printed.

The card media recommended is credit card size for conveniently storing printed cards in a purse or wallet. The application also allows large, legible fonts to be used for vision impaired patients.

This application is supplied as a site licence so it can be used throughout the practice including branch surgeries. We can also supply you with printers and print media. Contact us now to find out more about this amazing cost effective and time saving application.

Works with:

- EMIS – LV, PCS and Web
- INPS – Vision
- SystemOne
- FrontDesk

**Barbara Irving, Blackhall Medical Practice, Edinburgh -
"We've found printing appointment cards extremely useful."**

Dr Tang, Annfield Place, Glasgow - "Like LabelTrace, appointments is brilliant."
