

Setting up a New LP2824 Printer

This document provides guidance on setting up a new LP2824 printer for use with LabelTrace.

Unpack the printer and retain:-

- Printer
- Power supply
- UK power cord
- Head cleaning pen
- Sample label roll
- CD
- English version of the QuickStart Guide (in white envelope)
- Printer mode changing guide

Discard all else!

Setting up the Printer

- Install a label roll as per the QuickStart guide (check carefully!).
- connect the printer to a suitable power outlet.
- connect the communications cable to a suitable connector on the rear of the PC.
- run the Autosense calibration, as per the QuickStart guide (ensure you press the Feed key twice at the end of this process to put the printer back into normal printing mode).

Installing and Configuring the Software

Install and configure the software as per the instructions found in the User Guide supplied. This may be downloaded if necessary from our web site (in the Support section).
